LAND
ACKNOWLEDGMENT

*Falling into
the new norm*

ACKNOWLEDGMENT

IPAC NS is located in Mi'kma'ki, the ancestral and unceded territory of the Mi'kmaq People, and we acknowledge them as the past, present, and future caretakers of this land.

This territory is covered by the "Treaties of Peace and Friendship" which Mi'kmaq Wəlastəkwiyyik (Maliseet), and Passamaquoddy Peoples first signed with the British Crown in 1725. The treaties did not deal with surrender of lands and resources but in fact recognized Mi'kmaq and Wəlastəkwiyyik (Maliseet) title and established the rules for what was to be an ongoing relationship between nations. We are all Treaty people.

Mi'kma'ki includes all of Nova Scotia, Prince Edward Island, part of New Brunswick, the Gaspé region of Quebec, part of Maine, and southwestern Newfoundland.

Message from the Education Committee

Over the past two years we have come face to face with just how vital Infection Prevention and Control (IPAC) is, not only in health care, but in how society itself functions and thrives in the face of uncertainty.

Infection Prevention and Control has been thrust into the world spotlight. Hand hygiene, masking, social distancing and symptom testing are not new to the world of IPAC; however, they are now household concepts and practices.

We have seen great diversity during the pandemic regarding vaccinations, isolation, testing and masking.

We have worked hand in hand with Public Health organizations, Occupational Health & Safety and many other stakeholders to ensure that society as a whole were given every opportunity to keep their families and loved ones safe.

We have seen great loss in the last two years and have shed many tears for our colleagues who worked tirelessly on the frontlines of this pandemic. This not only forced us to keep striving for solutions, but it made us stronger and more innovative!

Artist and speaker Richard Hight said “Good things can come out of hard places”!

Now is the time to look at the “New Norm” and figure out how IPAC can continue to evolve. Now more than ever before the world is looking to IPAC for solutions, education, guidance, and our expertise.

Our hope during this Education Symposium is to examine the lessons learned over the past two years, and strive to make our programs and practices stronger and more fierce than they every were before.

What does our “New Norm” look like? How do we move forward? Will you be a part of shaping the future of Infection Prevention and Control?

Duane MacLeod BA/mm, BEd/MM, BScN, RN
IPAC Practitioner and 2022 Education Committee Chair

IPAC NS 2022
Join us at the
Symposium!
